UNIVERSAL SKIN CARE THERAPY

# VENOME COSMECEUTICALS UNIQUE CREAM

**Venome Unique Cream** — a versatile and light **concentrated nourishing cream** that helps **restore the hydrolipidic barrier**, providing a long-lasting **moisturizing effect** and protection, crucial for counteracting and reducing visible skin aging signs. The unique formula of the product, based on ingredients that **eliminate NMF deficiency, as well as cholesterol, and musk rose oil**, effectively soothes irritations and reduces erythema and redness.

**Unique Cream** contains highly concentrated **musk rose oil**, which is rich in **essential fatty acids** (linoleic acid and alpha-linolenic acid) — the **components of cellular cement** that help improve **hydrolipidic balance** and protect the skin against transepidermal water loss (TEWL), leaving it deeply hydrated, soft, and smooth.

What is more, rose oil is rich in **antioxidants as well as vitamins E, C and A**, and thus effectively **counteracts free radicals**, slowing down the progression of skin aging and boosting tissue regeneration processes, which in turn makes the skin more firm and supple. The combination of **hyaluronic acid and squalene** intensely moisturizes the epidermis and protects it against adverse environmental factors.

**The product** also contains **cholesterol**, which is naturally found in **human skin lipids**, and thus effectively **strengthens the integrity of the epidermis** and takes part in the **restoration of the hydrolipidic barrier**. Over time, the amount of cholesterol in our bodies goes down, which causes the skin to become drier and more prone to irritations. This is why it is vital to eliminate the **deficiency** of this ingredient through proper **daily skin care routine**.

**Medicinal yeast extract** — rich in antioxidants, amino acids and minerals — is a natural ingredient that **prevents the destruction of protein fibers** by free radicals and restores a healthy **environment** for cells, thus stimulating them to produce new **collagen and elastin fibers**. Furthermore, the yeast extract and **phytosphingosine** act synergistically to **regulate the work of sebaceous glands**, limiting the formation of **blackheads** and reducing any possible skin inflammation.

**Succinic acid is a natural tissue biostimulator**, and can be found in every living organism, as it takes part in the Krebs cycle in the mitochondria. This process is a **vital element of cellular respiration**, which results in the production of energy-carrying molecules (ATP) crucial for the healthy functioning of the body.

Therefore, sodium succinate contained in the product has the power to **accelerate cellular metabolism**, which leads to **quicker** transport of oxygen and nutrients to cells. This in turn increases their capacity to regenerate and to divide further, resulting in **intensified** production of protein fibers. Furthermore, succinic acid can produce a **strong antioxidative** effect, reducing the risk of collagen and elastin fiber damage.

The **complex of amino acids** such as glycine, proline, and lysine allows to restore skin firmness and elasticity by directly providing the building material **necessary for toning the skin**. The formula contains a **combination** of active ingredients that act as **emollients** (such as arginine, sodium lactate, mannitol, trehalose, and urea) which improve the **integrity** of the **stratum corneum of the epidermis and eliminate NMF deficiency**.

**Ceramide complex** found in the Unique Cream is a **binding material**, filling free spaces between cells, and allowing for the **restoration of the lipid barrier**, which could be impaired as a result of invasive aesthetic treatments, such as **laser treatments or chemical peels**, potentially leading to local skin dehydration.

**Venome Unique Cream** is a **regenerating concentrate** made to intensely **nourish** the skin, improve its hydration, and **strengthen the hydrolipidic barrier**, which is key to maintaining optimal water balance on the inside. The cream makes the skin soft and supple, and at the same time soothes irritations and restores glow.

#### DIRECTIONS FOR USE

Massage a small amount of cream onto cleansed skin in the morning and in the evening.

#### VENOME TIP

To boost the product's nourishing potential, use together with the Venome Acid & C serum.

**STEP I** – apply the **Acid & C Serum**

**STEP II** – apply the **Unique Cream**

#### RECOMMENDED IF YOUR SKIN

Is dull

Is irritated, with red patches

Is visibly dehydrated

Lacks glow

Is dry and tight, causing you discomfort

Is wrinkled and loose

Has an impaired hydrolipidic barrier

Has undergone intense aesthetic medicine treatments (peels, lasers, mesotherapy)

## VENOME COSMECEUTICALS ACID & C SERUM

**Venome Acid & C Serum** — intensely **regenerating nourishing complex** with **antioxidant** and **anti-aging** ingredients, synergistically supporting natural regeneration and **stimulation**, which helps make the skin **denser** and firmer. With its **velvety texture**, the **serum** absorbs quickly, leaving the skin radiant and moisturized.

The serum contains **an innovative form of vitamin C at the highest, 20% concentration**. This form of vitamin C is the most efficient, highly stable, and does not cause irritation. Furthermore, it can **effectively** penetrate the epidermis.

Vitamin C is an extremely **important** component for the **production of new collagen fibers**, which is why it is crucial to ensure its adequate daily supply. Owing to the use of ethyl ascorbic acid, the product can stay in the skin **longer**, boosting its **regenerative potential** and ensuring better protection. Regularly used over longer periods of time, the product helps the skin restore the right density and firmness.

Owing to the content of **ferulic acid**, with extremely powerful antioxidant properties and the capacity to reduce discoloration, the product **inhibits tyrosinase activity**, helping reduce **hyperpigmentation** and giving the skin an **even tone**. Ferulic acid also effectively minimizes the amount of free radicals which are responsible for damaging protein structures. The product also demonstrates **anti-inflammatory potential**, accelerating healing processes in the skin.

The content of **vitamin E** improves the skin's elasticity by improving the integrity of **intercellular cement**. Ferulic acid also enhances the action of tocopherol (vitamin E) and vitamin C, by making them more stable and improving their efficacy as **antioxidants**. This is why the product effectively slows down aging caused by free radicals.

**Alfalfa extract** demonstrates similar properties to retinol: it effectively **boosts cellular regeneration**, making the skin smoother and reducing the visibility of wrinkles.

A synergistic combination of **succinic and hyaluronic acids** enhances cellular stimulation in a natural way, reducing wrinkles and **improving tissue density**. Hyaluronic acid increases hydration in deeper layers of the skin, leaving it firm and toned.

**Succinic acid** in the product can **activate and accelerate** naturally occurring cellular **metabolism**, which significantly increases the number of transported ions and contributes to more efficient cellular respiration, all of which counteracts cellular degradation resulting from low oxygen levels.

Succinic acid also demonstrates powerful **anti-oxidative properties**, thus **lowering** the risk of oxidative stress which causes irreversible **changes in the DNA of the cell**. At the same time, regeneration processes occur much quicker, which makes the skin more resistant to external factors.

The **Venome Acid & C Serum** is an intense **brightening treatment** which effectively reduces hyperpigmentation and restores an even skin tone. Owing to its high anti-oxidative potential, Acid & C concentrated serum **accelerates cellular renewal**, improving skin tone and making the tissues **more elastic**.

---

#### DIRECTIONS FOR USE

---

Apply a small amount of product onto cleansed skin of the face. Massage until completely absorbed and use face cream suitable for your skin type.

---

---

#### VENOME TIP

---

To boost the product's nourishing potential, use together with the Venome Unique Cream.

---

**STEP I** – apply the **Acid & C Serum**

---

**STEP II** – apply the **Unique Cream**

---

---

#### RECOMMENDED IF YOUR SKIN

---

Lacks glow

---

Is dehydrated

---

Has an uneven tone with discolorations

---

Has visible aging signs (wrinkles)

---

Lost its density and elasticity

---

Is exposed to uv radiation

---
